ATTENTION!

All members of the Blairmore United church junior orchestra are requested to attend the first practice of the season at the home of their leader, Mr. Ed. Royle, on Thursday next at 7 p.m. prompt. Bring all music and stands. Any member not able to attend, please notify Miss Rose Oliver or Evan Gushul, stating reasons. Also, every member will be in their place at the Sunday school at 11 a.m. on Sunday.

Now that the holidays are over and everyone has had a jolly good time, and every pocket empty, it is to be hoped that the orchestra will get down to real serious business and whip itself into shape, so as to be capable to compete at the fall festival. Requests for the orchestra to play for other organizations should be submitted in writing to the secretary-treasurer, Wm. Dutton, junior, to be dealt with by the committee, composed of Rev. A. E. Larke, W. Dutton, sr., and D. McPherson.

The first principal for active membership in the orchestra is regular and not occasional attendance at Sunday school. All matters appertaining to the orchestra will rest with the conductor, who is the final authority. The co-operation of the congregation and parents, and the Sunday school, is earnestly asked for, so that the orchestra boys and girls will be a real asset to the church and community, and a credit to its founder.

ED. ROYLE, L.I.S.M.,
Conductor.

MAJOR SCHOOF AT EUREKA

Major Schoof is at present at Eureka, Montana, where he is busy lecturing and directing tourist traffic towards Canada. Speaking of the great traveller and lecturer, the Eureka Mirror of last Friday had the following to say:

Major G. H. Schoof, Canadian Mounted Police, game, fish and forest guardian, is enjoying a two weeks' stay at our tourist park. He is recuperating from a slight illness, and in an interview with the editor stated that he considered Eureka the most ideal spot on the face of the globe.

It is true that the dominion has appropriated \$1,000,000 a year or more to be expended for the elimination of level crossings. But it would take a huge sum to do away with all these crossings, even if only those on main highways in Canada were taken out.

Recognizing the fact that the dominion would have to spend hundreds of millions of dollars to eliminate all level crossings, one must place more reliance on the need of educating drivers to exercise the utmost care at such crossings.

"Stop, look and listen," should be impressed upon drivers again and again. Then there will be no grounds for possibly the lack of thought that caused the Bellevue tragedy.

Take the greatest possible care in approaching a level crossing. Be on the alert for trains and accidents will be avoided. That is the only way to wholly cut down the level crossing toll in Alberta, which same rule will apply to other provinces.—Voice of Motordom.

DEATH OF MRS. LEE

The death of Mrs. Leona May, wife of William Lee (formerly Miss Cyr) of Pincher Creek, occurred at the local hospital on Saturday last.

Mrs. Lee is survived by her husband and three small children.

The remains were laid to rest in the Union cemetery yesterday afternoon, following service at the United church.

FORMER COWLEY RESIDENT PASSES AT PINCHER CREEK

The remains of John Herron, ex-M.P., were laid to rest under Masonic auspices at Pincher Creek on Saturday afternoon last. The funeral was largely attended by friends and relatives from all parts of Alberta.

An impressive service was conducted at the United church, following which the funeral cortège proceeded to the Protestant cemetery, where interment was made, following last rites of the church and the Masonic Order.

John Carney, of Ashville, formerly of Bellevue, passed away town at Pincher Creek, greeting cheerfully many old friends.

John Herron was elected member of the federal parliament for Macleod constituency in the general election of 1900, and was re-elected in 1908, but was defeated by Dr. David Warnock in the famous Reciprocity election of 1911. In 1921 the veteran public man was again in the political arena and though well advanced in years conducted a vigorous campaign, only to be defeated by the U.F.A. candidate, G. G. Coote. He was a lifelong Conservative and a close personal friend of Sir Robert L. Borden, former Premier R. B. Bennett, and other prominent Canadian public men.

In early military and police circles John Herron was an outstanding figure. He was a sergeant-major of the Princess Louise Dragoon Guards at Ottawa in 1872-82, a smart militia unit which he assisted in forming after he left the Mounted Police force in 1878. This cavalry force formed the guard of honor for Princess Louise during her stay in Canada at Rideau Hall, and he often recalled many pleasant conversations he had with the princess.

He joined the N.W.M.P. in 1874, and was appointed Inspector Brisbois to Calgary when the first police post was established there the year after Fort Macleod's establishment in '74, having the honor of driving one of the first stakes for the fort in East Calgary.

The young policeman, accompanied by the government party of General Sir Selby Smythe to Walla Walla, Wash., and returned on horseback to Fort Macleod through seething U.S. Indian tribes following the famous Custer

Massacre on the Little Big Horn.

In his police and military days he was a noted athlete. At Ottawa he captured eight of 12 silver cups offered by the Governor-General for military sports honors.

Mr. Herron was pre-deceased by his wife. Three daughters survive: Mrs. Ambrose, of Pincher Creek; Mrs. George J. Hunter, of Vancouver, B.C., formerly of Lethbridge; and Mrs. J. L. Jamieson, of Calgary, also a former Lethbridge resident.

Pall-bearers were: J. Kemmis, of Calgary, an old friend of Mr. Herron's, J. W. Harwood, R. O. Allison, J. T. McAllister, W. A. Fraser and Mr. Taysum, all of Pincher Creek.

Among the many attending were Dr. and Mrs. Mills, of Lethbridge; Mrs. Rhodes, Lethbridge; R. Patterson, ex-M.L.A., Macleod; Mr. and Mrs. Tom Moore, of Calgary; Mrs. J. Nicoll, Calgary; H. M. Hatfield, Edward Faithorn, E. A. Cox, Fred Peltier, Dick Lynch-Staunton, Charlie Lynch-Staunton and W. Eddy. Scott funeral home had charge of arrangements. Mrs. Nicoll sang by request of the family.

Quite a number from the Crows' Nest Pass towns attended the funeral.

Appointment of D. M. McDonald, of Edmonton, as inspector of fur farms for Alberta, was announced last week by Hon. C. C. Ross, provincial minister of lands and mines. The game branch, recently transferred

to that of lands and mines, is being reorganized. Some 2,000 fur farms in the province will be supervised by Mr. McDonald. Mr. McDonald is a Prince Edward Islander.

Mr. Roy C. Taylor, M.P.P., for Pincher Creek, and one of the ablest debaters in the present parliament at Edmonton, is Alberta's new deputy speaker, succeeding Hon. Lucien Maynard, minister without portfolio.

—P.M.

IF TEACHING IS TO

BE A PROFESSION

School teaching has attained to the euphonious status of a profession. Yet we saw in The Albertan this week two advertisements that rather belied such status. One asked for an experienced teacher with a first-class certificate, all for the salary of \$450 a year—\$45 per teaching month. Another was slightly more generous, about \$55 per teaching month, payable as funds are available. The relief strikers in Medicine Hat are demanding twice as much wages that. If it takes \$400 to send a boy or girl through Normal School, how old will he or she be when the financial obligation thus created is paid off from the savings of a \$45 a month school teaching job?—Clareholm Local Press.

WORLD HAPPENINGS
BRIEFLY TOLD

General Evangeline Booth of the Salvation Army, will leave London in November for a tour of the Far East.

The United States egg-laying record was scratched off the book by a Maine hen which laid 214 eggs in 214 consecutive days at the state experimental station in Monmouth.

Although deaf since birth, B. L. Pitcher, 26, of Worthing, England, has taken his bachelors of science degree (second-class honors) at the London University.

Hans Eduard Giese, 32, was headed in the first execution under Germany's new death penalty for kidnapping. Giese was convicted of kidnapping the 11-year-old son of a Bonn merchant, June 14.

H. A. Taylor of Clear Prairie, west of Faust, Alberta, has not got hot and cold running water at his farm home but has had water. He diverted a small stream and now fresh water flows by his doorstep.

The last remaining link between Emperor Haile Selassie and his East African empire was severed by the Italian invaders with publication of a decree confounding all the fugitive emperor's property and possessions.

Hughenden Park, historic Buckinghamshire estate, which was the home of Benjamin Disraeli, has been bought by High Wycombe borough council as a memorial to King George.

Reviving diplomatic tactics rare since prohibition days, the British government has made representations to the United States against coast guard seizure of an alleged rum runner flying the British flag.

Discovery in Saskatchewan of a triceratops, a species of horned dinosaur, has aroused interest in the Royal Ontario museum of paleontology since the museum possesses no specimen of this type.

Clears Up Puzzle

Rings on Fish Provide Data For Their Movements

Microscopic annuli, or growth rings, on the scales of striped bass are providing science with new data explaining for the first time the mysterious movements of fish that have puzzled fishermen for generations.

Daniel Merriman, graduate student in zoology at Yale University is completing an extensive study of the growth rings on bass at the mouth of the Niantic river, and has found that the rings correspond to the growth rings of trees. Studied under a microscope, the annulus reveal the age of the fish, the rate of growth, and whether it goes south in winter.

"If the fish spends most of its time in warm water, going south in winter, it grows faster and the space between the rings is wider," Merriman declares. "The reverse is the case when the bass spends its time in colder waters along southern New England shores."

"This latter condition has been found to be the case in about 10 per cent of the scales examined thus far, indicating that a large majority of striped bass found in Connecticut waters go south for the winter."

By means of netting, tagging and releasing more than 500 of the fish in the Niantic river, data indicating the time of bass migrations also is being studied. Based on returns by fishermen of about 8 per cent of the numbered tags, it is apparent that the spring migration northward arrives in April and moves along toward Rhode Island through May and June.

A Talking Chair

Cincinnati Dentist Says It Helps Entertain His Patients

A Cincinnati dentist told the National Dental Association "Beethoven's" Fifth Symphony can be of great assistance when the dentist tackles a stubborn molar.

Dr. J. H. Sharpen, addressing 200 Negro dentists attending the convention, disclosed for some time that he had entertained patients with music, literary discourses and reports of ball games provided by means of devices attached to the head rest. He said the "talking chair" could be manipulated so only the patient heard the program or all within the office heard it, as desired.

Clerk: "Please, sir, there's a traveler been waiting two hours to see you."

Boss: "Send him away, and apologize for not having done so two hours ago."

There are references to blood transfusions in the writings of the ancient Greeks, Romans, and Egyptians.

"The Great Barrier"

Canadian Film Epic, Produced In Rockies, Is Near Completion

Revelstoke, British Columbia, is viewing with no little interest the making of an epochal film of an historic Canadian development, one that admittedly cemented the West with the East at a time 50-odd years ago when it appeared that the Pacific Coast people would have a line permanently apart from the young confederation of provinces and when the prairies were stirred by rebellious activities. The picture that is taking final form is "The Great Barrier" which is being produced in Revelstoke and the rugged areas around Golden, Field and Lake Louise by the Gaumont British Picture Corp., Limited.

For the making of this picture, which deals directly with the truly prodigious construction of the lines of steel through the treacherous mountain regions of British Columbia and Alberta which were to form the first transcontinental railway, the largest production unit of any film company ever to invade the Dominion has been at work for many weeks.

Last March saw the arrival of the first band of film people from the London studios and they started right in to make snow scenes at Glacier while the whole countryside still bore a white mantle. More technicians followed at intervals until June 25 when the main unit comprising 31 persons and headed by Richard Arien, leading man of the cast, reached Revelstoke to find the "Muddy" street set already erected—a seemingly complete pioneer settlement only two short blocks from the city's modern main street.

With the subsequent arrival of J. Farrell Macdonald to portray the role of "Marty Hell's Bells Rogers" and five other players from Hollywood, there were less than 100 persons on the set, the crew including 12 artists and the production, technical and staffs, all but two, which were sent from England by the Gaumont.

In addition, there are 120 extras, carpenters, painters, electricians and property men who have been mobilized locally.

Most of the extras, close to 100 persons are on the regular pay roll of the unit.

These give a general idea of the "Great Barrier" company for the producing of the Canadian picture on the actual locations of the historic railway project which according to the film by Gustav Stennerhorst, will cost a cool million dollars before it reaches the theatre screen.

This is a handsome apology, one which could not have been more amiable, unsparring of himself and does his lordship proud. A public man who is capable of apologizing in public and even condemning himself, shows that he is a man who is able to do his duty.

This is the British tradition of things, and ranks with the apologies which have been made in the House of Commons by Premier Baldwin and other cabinet ministers who have openly apologized when they erred in making some statement—St. Thomas Times-Journal.

FORMER GOVERNOR-GENERAL IN NEW ROLE

The procession of civic dignitaries in procession from the Castle Keep to the Church of St. Mary-in-the-Castle at Dover when Lord Willingdon was installed as Lord Warden of Cinque Ports.

Judge Criticizes Himself

Apologies In British Court For Remarks Made At Trial

At the London Sessions recently the presiding judge, Sir Herbert Wilberforce, not only withdrew some remarks he had made in the course of a trial, when the jury stopped the case, but criticized himself for having made them.

"I ought to say, with some regret," he said, "that some observations fell from me yesterday which ought not to have been done. They were made under the influence of temporary emotion of which no one occupying the position I do ought to be guilty."

This is a handsome apology, one which could not have been more amiable, unsparring of himself and does his lordship proud. A public man who is capable of apologizing in public and even condemning himself, shows that he is a man who is able to do his duty.

This is the British tradition of things, and ranks with the apologies which have been made in the House of Commons by Premier Baldwin and other cabinet ministers who have openly apologized when they erred in making some statement—St. Thomas Times-Journal.

Diamond Trade Improving

Continued improvement in the South African diamond trade has led to the belief that Kimberley will resume full production this year. The Dutoitspan Diamond Mine is being re-opened and possibly will start production on a normal scale soon.

Another Kimberley diamond mine will be ready for re-opening before

the end of the month.

Some men are fired for ambition; others for the lack of it.

The only thing some people have in common is the weather.

Some men are fired for ambition;

others for the lack of it.

We can always oblige but we can always speak obligingly.

Ice cream was known as long ago as the 17th Century.

Makes A Difference

"What is the matter, my little man?" asked a sympathetic stranger of a small boy whom he saw crying in the street.

"Please, sir, my dog's dead," sobbed the boy.

"Well," said the man, "you mustn't make such a trouble of it. My grandmother died last week, and I'm not crying."

"No," said the boy, "but you didn't bring her up from a pup!"

We can always oblige but we can always speak obligingly.

Household Arts by Alice Brooks

Butterflies and Flowers Combined Give Choicest Linens Rich Design

PATTERN 5645

This cutwork in simple lines—no bars—will transform your buffet or add a smart touch to your entertaining when used as tray cloth or doily. We can do the flowers and butterflies in all natural colors or do the entire design more conservatively in one color.

In pattern 5645, the flowers will fit a 16 x 15 inches tray or doily; 7 x 9 inches for a small doily.

Illustrations of all stitches needed; material requirements; color suggestions.

To obtain this pattern send 20 cents in stamp or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg.

There is no Alice Brooks pattern book published.

SUNDAY SCHOOL LESSON

AUGUST 30

BEGINNING OF WORLD MISSIONS

Golden text: And he said unto them, Go ye into all the world, and preach the gospel to the whole creation. Mark 16:15.

Lesson: Acts 11:19-26; 13:1-12.

Devotional Reading: Isaiah 42:6-10.

Explanations And Comments

The Gospel Reached the Gentiles in Antioch, Acts 11:19-21. The persecution that followed the death of Stephen turned out to be "a mission" for the Gentiles, organized by the Jews of the new faith.

"The storms of persecution are only winds which fan the fire of faith and carry the 'sparks of truth' to a distant land." The Jews of the new faith, to other Jews as far as Phoenicia and Cyprus and Antioch of Syria, and even Cyrene and Cyrenaica came to Antioch to preach the gospel.

When the Greeks came to the Greeks and the Romans to the Romans, the result that a great number believed and turned unto the Lord.

Of the Gentiles, the church at Antioch Jerusalem was as unconscious of the average church in America is of the establishment of a church in England. The first concerned Jerusalem was the men and women outside the Jewish faith who were being baptized at Antioch. Peter had investigated the somewhat similar situation in Joppa, and Barnabas was sent to look into this unauthorized revival among Gentiles.

Barnabas was full of joy, of joyousness and of precipitation, but the Holy Spirit, in faith in God and in his neighbors. He approved of the new departure of preaching to Gentiles, and when he returned to Antioch with Paul, he said, "We have found a man who is a true prophet of the Lord."

For twelve years had passed since Paul had first preached the gospel to the Damascene and during this time he had been in his native city of Tarsus. The church at Antioch had not made much headway, and Barnabas remembered Paul, and returned with him as his co-worker in the church.

It was here at Antioch that the first Christians were first called Christians. Christ's men, Orthodox Jews before that had called them Galileans. Numerous converts there, called themselves learners, disciples, the faithful, believers, brethren, those of The Way.

Third Man In Cab

Head Brakeman On Freight Train Is Not Very Comfortable

A new item that sounds puzzling to the layman came out of Washington the other day. It said that the Bureau of Railway Engineers had asked the Interstate Commerce Commission, the body that rules U.S. railroads, to order the railroads to equip their engine cabs with softer seats, foot warmers and padded arm rests.

The explanation, however, is simple. The head-brakeman on a freight train has to ride in the engine cab.

He's the conductor's lieutenant at the front end, keeping his watch up there, getting down to turn switches, keep an eye on the string of cars back of the engine and doing the many other little things a trainman is hired to do.

But when the train is moving, the head-brakeman can, except in the rear corner of the engine cab, look out. To be out of the way of the engineer and particularly of the fireman, who, unless he has the help of a mechanical stoker, is busy shovelling coal under the boiler, the head-brakeman gets into a spot somewhere near one corner of the boiler. It's a hot spot in the summer, a cold-on-one-side-and-hot-on-the-other side in the winter, no cushions or arm rests soften the jar of the locomotive during fifty or sixty miles. If he puts his feet up against the boiler they roast; if he doesn't, they freeze. So, curtains, padded arm rests and foot warmer are in order.

In Canada, we are told, a similar request has been made to the Board of Railway Commissioners, the Dominion's railway ruling body. But for some reason, the request has not been granted, probably because Canadian trainmen are not subject to "cold feet"—St. Thomas Times-Journal.

Strange Collection Of Plants

St. Louis Garden Has Thirteen Different Species From Antarctic

Shaw's Garden at St. Louis, Missouri, known the world over for its display of plants and flowers, now has an exhibition thirteen different species of lichen plants—collection of Admiral Richard E. Byrd, famed Arctic explorer.

The collection, as strange and unusual a display as has yet been offered to nature lovers at Shaw's Garden, represents the last bit of the expedition the Byrd expedition saw as they approached the South Pole.

The rugged, moss-like growth was observed by the expedition as it kept a precarious existence on the northern exposure of mountainous peaks within 200 miles of the pole itself.

This is an increase of some 23 percent over the \$24,535,700 boxes was obtained by dog owners during the first six months of 1935.

Boxed Apples From B.C.

The output of boxed apples from British Columbia has varied in a five-year period from \$4,477,000 in 1931 to \$40,400,300 in 1934. The 1935 crop of 4,953,700 boxes was at an average but with better prices the returns were the highest or over five million dollars.

Gentlemen—"Can you go into any business more profitable than beggar?"

Beggar—"Well, sir, I'd like to open a bank, but I haven't got the tools."

A Valuable Discovery

Scientists Find Poison Ivy And Vitamin C Are Related

A peculiar relationship between vitamin C and sensitiveness to poison ivy has been observed in experiment on guinea pigs. When the animals were on a diet deficient in the vitamin, they were insensitive to the poison ivy, but when the vitamin was applied to their skin they became sensitive to the poison ivy and exhibited severe reactions.

Application of the vitamin to the skin was necessary to produce this sensitiveness, reports Dr. F. A. G. Schlesinger, of Louisville, in a report of his experiments published in "The Journal of Immunology." When the vitamin C extract was injected into the veins, the muscles or the abdomen, the sensitivity was not produced at all or to only a slight extent.

The whole body of the guinea pig became sensitive to the poison when the vitamin was applied to only a small area. The agency in the skin that produced the sensitization spread rapidly. If the area of the skin to which the vitamin extract was applied was removed within 20 hours, the sensitivity to the poison did not develop in the skin on other parts of the body. If removed at the spot of skin delayed longer than this, the sensitization spread to all parts of the skin.

Efforts to get this same reaction in rabbits, rats and cats were unsuccessful. What possibilities this discovery has for making human beings less sensitive to poison ivy or for treating individuals suffering from contact with the plant still remains to be discovered, as no experiments with human beings have been made.

There is a great difference in sensitivity to poison ivy. Some people can touch the glossy leaves of the plant with impunity, while others develop severe inflammatory outbreaks all over their body if they come in contact with the plant. The poison ivy factor in the plant is a volatile oil. Those who are extremely sensitive are affected by the small amount of oil that is evaporated from the leaves carried as vapor in the air and condensed on their skin. Persons with light-colored skins seem to be least sensitive to poison ivy.

Vitamin C, which produces the sensitivity to poison ivy in guinea pigs, also is known as ascorbic, hexuronic and cevitative acid. It prevents scurvy, which affects the bones, skin and muscles and which sometimes accompanied by hemorrhages of the skin. It is found in many fruits and vegetables. It was first extracted in bulk from oranges and lemon juice and later was obtained much more plentifully from papaya.

Recruiting In Britain

Military Leaders Trying Hard To Fill Up Empty Ranks

Recruiting propaganda of every description, foods Britain as military leaders seek to encourage reluctant British youth to join the colors.

With oratory, appeals to national pride, emphasis on the advantages of army life, and attention to the seriousness of the situation, the efforts to fill empty ranks in the territorial forces especially, are daily becoming more pronounced.

Secretary of State Duff Cooper leads the pressure for recruits with his outspoken comments on pacifism and war dangers, and with his hints that conscription may become necessary.

Pedigree Dogs Are Costly

American Owners Spend \$30,256-\$32,500 In Six Months For Their Care

American purebred dog owners increased their spending to \$30,256-\$32,500 in order to feed, kennel and give simple modification to their pets during the first half of 1936, according to a survey released in New York by the American Kennel Club, governing body of the sport of dogs in the United States.

This is an increase of some 23 percent over the \$24,535,700 boxes was obtained by dog owners during the first six months of 1935.

Boxed Apples From B.C.

The output of boxed apples from British Columbia has varied in a five-year period from \$4,477,000 in 1931 to \$40,400,300 in 1934. The 1935 crop of 4,953,700 boxes was at an average but with better prices the returns were the highest or over five million dollars.

Gentlemen—"Can you go into any business more profitable than beggar?"

Beggar—"Well, sir, I'd like to open a bank, but I haven't got the tools."

Thou Shalt Not Love

A NOVEL BY —
GEORGIA GRAIG

CHAPTER IV.—Continued

"Whew! So it's like that! I thought there was something—the minute I saw you—Egyptian yourself—those eyes—your skin. . . Or say, maybe you're some nabob's heiress in disguise, seeing the sights, eh?"

Starr smiled, but did not look at him. "Not an heiress," she said slowly. "Merely the holder of an heiress—of most indeterminate value."

The man's eyes were puzzled. He glanced around the room. He knew the place. There was no uncertainty about the type of people who frequented it. Particularly about the women, who frequented it. Oh, most especially about the women. And yet—Here was a girl who looked like some Egyptian princess come to life, and she spoke like—Michael Fairbourne gave it up. No girl he knew could come back at him with the Arab evening prayer for an answer, and he was fond of bringing into the conversation whenever he could some reference of that one trip of his to Egypt.

Better watch his step, though, when he got right down to talking to a daughter of the Nile. If she was one. There was something, mighty American about this girl, for all of her mysterious eyes. And he must not forget that his one interest in talking to her right now—in talking to any girl—was . . .

He lifted his cocktail glass, smiling at her over it.

"You," he remarked, "if I remember, were complaining just a few hours ago about wanting to play, to be doing all right. Hope I didn't worry you sympathetic."

"You don't understand," said Starr, and wondered if she should go. After all, did she have any right to be here under such false pretenses?

The man laughed. "You said you wanted to play, didn't you? Well?"

Her eyes glowed with that strange, mysterious inner fire, Starr faced him. She repeated, as if it were a lesson well learned in a voice despairing, desperate, the exact words she had said to this same man at noon on the sunlit Avenue:

"Yes! More than anything else on earth, I do want to play!"

And then a rush of hot, incoherent words that for the life of her she could not have held back, came from her quivering lips. The voice of suppressed emotion too powerful to control, the day had been gathering for its climax, the cry of a Hitler, tortured soul that tore through all the civilized repression which she had sought to bring to her aid through philosophic reverie.

She did not seem to be talking to the man especially. She was crying out to the world at large, and to Heaven above, in the sordid atmosphere of that cafe in which her mental state might as well have been a mosque or a Borgia mission.

"Yes! I want to have everything I've never had! I want to crowd a lifetime of excitement into every single day! I want to spend money; I want gorgous clothes; I want to be so beautiful that every man will envy me, and every man will want to love me. I don't want to think of yesterday nor tomorrow—just today! I want to dance and sing and laugh. I want to be as bubbly as champagne!"

Her voice trailed off, the burst of passionate emotion over. What was the use? She might as well stay for the moon. She couldn't even be here under false pretenses talking to a man at all; if she hadn't run away from the same man into the Museum and then as a sort of reaction decided to have come kind of a fling at least with her last pitiful bit of change. He would never understand that. Nobody would. But who

would believe her reasons—or that she, young as she was, was one whose sands of life were already all but run out?

A damp chill clouded everything. The blare of the orchestra might as well have been from another world. Her eyes must have been moist, for the tall figure of the bronzed stranger who had so carelessly and confidently asked to sit beside her was suddenly blazed.

In a daze, he felt his hand touch her arm. He was speaking to her, the queerest odd note in his voice.

"You and I must have a serious talk, young lady," he announced in that masterful tone of his. "I thought so the first time I saw you on Fifth Avenue. I was so nearly certain of it that I almost chased you later in the day, and when I marched into here a few minutes ago to get out of the rain and saw you, I was certain of it. . . . You—you sound as if you were the very girl I'm looking for."

A vague remark, but as he said it in that crisp voice of his there was something so impersonal in the tone, the intonations, that Starr had no feeling of discomfort which would certainly have been the case if a more personal tone had crept in. She glanced at him shrewdly but he was not looking at her. His eyes were narrowed, as if he were deeply considering some important problem.

"I don't understand," she said, her tone almost a whisper.

He nodded, and his grin came back. "You will. I'll see to that."

"Let's dance."

Starr had never had much opportunity to dance, but she loved it. She was a dancer born, and feeling as she did tonight it would have made no difference to her whether she was dancing in a questionable night spot like La Luna, on a pocket handkerchief floor, or on the sands of the great desert. Dancing with this stranger who had so oddly come into her life, though, was a breathless business, would have been even if it had not been for the novelty of her own devil-may-care attitude which she still did not quite understand. He was so tall and so graceful, as he swept her around the room; she could not have helped following him if she had never danced a step in her life.

She was panting a little, her mysterious eyes shining, when they paused a moment at the close of the dance, and the other dancers set up an insistent clamor for an encore. The music swung into a rhumba, and Starr was in his arms again. That was one dance she had never tried in her life, had never even seen. But when her tall companion swung into the little miming, precocious step, she followed his lead easily, as if she had been dancing with him all her life. It was a mad dance. One to make every nerve tingle and the blood pulse high through the veins.

Starr forgot that she had always been dancing through life. She forgot the curse of "Tut-Amen-Ra," that was written on her hand but six months. She had never felt so gloriously alive. She forgot her grief over going into eternity without living, for she was living.

When the music slurred to a close, she looked up into the tall, bronzed man's face as he led her back to their table. With glowing eyes, still under the spell of a sort of pagan music which was new to her, she said:

"That was glorious! I didn't know dancing could be like that."

There was a twisted smile on his lips as he glanced down at her.

"You've got a good racket," he murmured. "You said—that as you mean it. Nothing like throwing your heart into your profession. . . ."

He hesitated, as they sat down, eyes half-closed again. "But my guess is you're rather new at it?"

"Well, for me."

Starr felt the painful flush that crept to her cheeks. It was as well as her she did not understand. That was what she said.

"I—I don't understand."

The man laughed comfortably. "Perfect! Better and better."

"I've got go now," Starr said, but he touched her hand, beckoning to the waiter. "Wait a minute. I want you to tell me one or two things. Will you?"

"Of course—if I can." Starr's eyes showed surprise.

"Okay . . . First: Are you by any chance an orphan?"

Her eyes widened. "Why, yes, but how did you know?"

"Never mind. Next: It couldn't be that you're here in New York on your own—no kin? No next of friends, as they say, or something like that? No husband nor entanglements? No too-persistent—buy friends?"

"No," said Starr. "Especially the last!" There was a resentful note in her voice. "But I can't imagine why you should—"

"Never mind," the masterful one retorted. "Good! There'll be no more questions. In fact, the fewer the better for what I have in mind. Don't

like questions, anyhow. . . . Believe in thinking like a Chinese valet I had, who would insist, when I'd want to know something or other: 'Mind always sublimely innocent of idea not its own business.' What I've just asked you is my own business, or at least I think so, and—"

"You'll have to explain, I think," Starr said, and was uncertain whether the joy of her dance, the sense of being "in things" was worth what was beginning to look like a rather impudent cross examination which was not justified. Still it was nice here, no matter what kind of place it was, and she was gathering that masterful tone of his companion's dropped remarks that it was not exactly his kind of rudeness. Much better, than being "outside" alone going nowhere.

It looked anything but cheerful outside. A cold rain railed down the wide curtained window, blistering the pane with steely-looking drops; mist hung around the street lights. It would probably rain the rest of the night. It made even a place like this a cocoon of delight to a forlorn girl—a place that was all warmth and soft lights. What if there was heartbreak, too? Wouldn't it be heartbreak if she was trying to forget.

The man beside her was saying something, but at first she hardly realized what it was. It made so little difference. She was watching his hands fumbling a little nervously with his glass, as though he were a bit uncertain himself just what it was he wanted to say. She heard him repeat:

(To Be Continued)

King Edward's Car

Built For His Personal Use, It Has Many New Features

The new motorcar which the King has had built for his personal use is limousine, with maroon body and vermilion lines, says the Overseas Daily Mail. Londoners remember the royal car always used by the late King. It was recognizable not only by its red shield with the gold crown and its absence of number plates, which give it a right of way through all traffic. It was also the largest private car in the world, with a wheel-base of 13 feet one inch and a track of five feet four inches. There was a reason for this. King George and Queen Mary sat on two armchair seats that were fixed to the door pillars, in the exact middle of the car. Behind them sat a lady-in-waiting and an equerry. Since King Edward is not married there is no longer any need for an unusually big limousine. It was therefore decided, at his son's insistence, to build a state car in which the King and his equerry could be seated in comfort at the back. Between the King and his equerry is an arm-rest which is interesting. By lifting up the top of the rest, the King will have access to a sort of miniature desk in which are pen, ink, pencils, paper and even cigarettes. This is not the only new feature. Newly-designed lamps have been introduced and now King Edward will be able either to read or to write in the car, with his unique country will record him to the throne.—Cavalcade, London.

Despite his domestic troubles, Alfonso still looks to the time when his unhappy country will record him to the throne.—Cavalcade, London.

Now Queen Elsa lives with her mother, Princess Beatrice, daughter of Queen Victoria, at Kensington Palace on an annuity of £5,000 provided for her by King George. She never sees King Alfonso on his visits to London.

One on German Railroad Makes 92 Miles An Hour

One of the fastest steam locomotives in the world is run by the German National Railroad Company. It makes 109 miles on forced runs and an average of 92 miles per hour on usual runs. This speed is attained in one piece, cut very low, so that the driver may have an absolutely clear view. Should the King wish to have more than one equerry with him, there are two folding seats, built in so that those who use them will face forward.

Small European Wheat Crop

Reported To Be The Lowest In Three Four Years

The smallest wheat crop for three or four years in continental Europe was reported by the United States department of agriculture.

Its bureau of agricultural economics said the European crop, excluding Russia, would amount to about 1,492,000,000 bushels compared to 1,573,535,000 bushels last year. The countries in the Danube basin will produce 359,000,000 bushels this year compared to 301,690,000 bushels last year, it was said, because of an excellent crop.

This year's surplus in the Danube will care for several deficit producing countries in Europe, it was said. However, some significant increases in European imports of wheat are expected, the report said, because of a desire of some countries to build up stocks.

Snobs are people who make embarrassed excuses when unexpected guests catch them eating in the kitchen.

A dentist in Illinois diverts the attention of his patients by showing moving pictures on the wall in front of them.

2165

The Cause Of It All

Many Areas Have Had Drought Conditions They Never Knew Before

When the farmer must stand helplessly by and see his season's crops, his year's hopes, all snuffed out by a scorching sun and hot winds, with no rainfall to relieve the situation, it is bad enough, and about all that human endurance can bear; but when on top of all that the home water supply fails it is no wonder if discouragement turns to bitterness.

What's it all about—this unusual weather we have had the past few years? Many regions have had heat and drought they never before knew, in both intensity and duration. Then last winter the other extreme of unprecedented cold brought its share of suffering and loss. Is our climate changing? Or, as some think, are we as a people being punished for our drift away from religion and the discipline of the spirit which it imposes? Have we had too much, have we lived too easily, and because we are so humble and thankful to a Supreme Power that showered blessings upon us, are we now being set back to a taste of hardship to bring us to our senses? There are plenty of good, substantial people who feel this way—and who is there to say they are not right!

But we can only go on, expecting in tomorrow what we experienced yesterday. It is the only guide we have, and when our yesterday again comes true, let us not forget to be humble and thankful before a Power that we cannot understand but in which we sense the control of our destinies.—Chicago, Daily Drovers' Journal.

Hopes To Be Recalled

Former King Alfonso Thinks Spain May Want Him Again

Once-King Alfonso, 47, less deformed than in the early days of his exile, his swarthy face more lined and his agile figure heavier, packed his bags and headed for Madrid. The British Royal family have not forgiven him for leaving Queen Elsa to find her own way from the rioting capital.

Now Queen Elsa lives with her mother, Princess Beatrice, daughter of Queen Victoria, at Kensington Palace on an annuity of £5,000 provided for her by King George. She never sees King Alfonso on his visits to London.

Despite his domestic troubles, Alfonso still looks to the time when his unhappy country will record him to the throne.—Cavalcade, London.

A Speedy Locomotive

One On German Railroad Makes 92 Miles An Hour

One of the fastest steam locomotives in the world is run by the German National Railroad Company. It makes 109 miles on forced runs and an average of 92 miles per hour on usual runs. This speed is attained partly through the use of a streamlined enclosure which covers the entire locomotive.

The new locomotive is eighty-five feet long and fourteen feet high, and its larger wheels have a diameter of approximately seven and a half feet. At the speeds mentioned the locomotive hauls a train of five express coaches weighing together 25 tons.

The engine is a three-cylinder super-heated express train locomotive developing about 2,800 horsepower under two sets of atmospheres. It has two main engines, front and behind, and three transmission gears; which are three transmission gears which cover the entire engine.

On account of the high sustained speed of the locomotive, special attention has been paid to the brakes. The train can be stopped within slightly more than one-half mile at a speed of 108 miles. Besides, there are photoelectric automatic brakes which function in case a stop signal is overlooked by the engineer.

This year's surplus in the Danube

will care for several deficit producing countries in Europe, it was said. However, some significant increases in European imports of wheat are expected, the report said, because of a desire of some countries to build up stocks.

Snobs are people who make embarrassed excuses when unexpected guests catch them eating in the kitchen.

It's almost impossible to find the kind of work you like. So many other men, as they say, or something like that! No husband nor entanglements! No too-persistent—buy friends?"

"Never mind," the masterful one retorted. "Good! There'll be no more questions. In fact, the fewer the better for what I have in mind. Don't

Lake Water Analyzed

Astronomer Has Discovered Why It Appears Intensely Blue

Crater Lake, in the Cascade Mountains near the California border of Oregon, is the remains of an extinct volcano. Its waters are an intense blue, "unbelievably blue," according to many observers. The reason for this blueness has been one of the subjects of the investigation conducted under the auspices of the National Academy of Sciences.

Dr. John C. Mirmiran, president of the Carnegie Institution of Washington, selected for the investigation Dr. Edison Pettit, an astronomer on the staff of the Mount Wilson astronomical observatory. An astronomer was selected because it was believed that the color was a light phenomenon and Dr. Pettit is an authority on light.

Analysis of the water of the lake, which is the deepest in the world, showed that it contains more than most drinking water, only 88 parts in a million of solid matter suspended in it, while 500 parts were allowed in drinkable water. It contained only ten parts of chlorine, while drinking water may contain twelve. Chemical contents and suspended matter were eliminated by tests as agents giving the water a blue coloration.

Experiments were then made on the scattering of light by various kinds of water. This scattering is due to the reflecting of the light rays selectively by particles or molecules of water deep in the body of the water, as distinct from light reflected at the surface of the water. Ordinary tap water contains so much suspended matter that both the long red and short blue rays are scattered in equal amounts, making the reflected light as white as the beam that entered. Ordinarily distilled water reflected back slightly more of the shorter wave lengths, giving the light coming back a slight bluish tinge. Distilled free distilled water gave a strong blue color to the light reflected back, and so did ocean water that had been allowed to settle undisturbed for years, and also Crater Lake water. A similar effect also accounts for the blue color of the sky, Dr. Pettit concludes.—New York Herald Tribune.

Virtue Rewarded
Negro Came in to a border town in Ohio on election day. In the afternoon an acquaintance met him. "Have you voted, Rastus?"

"Yassir, I'se voted." "How did you vote?" "Well, boss, it was dis way. I meets a Republican in de street an' he give me 'leven dollars to vote his ticket. An' I meets a Democrat an' he gib me seven dollars to vote his ticket. So I voted for the Democrat."

"But the Republican gave you the most money."

"Yassir, I'se voted." "Well, boss, it was dis way. I meets a Republican in de street an' he give me 'leven dollars to vote his ticket. An' I meets a Democrat an' he gib me seven dollars to vote his ticket. So I voted for the Democrat."

CHOOSING A UNIVERSITY
SITY PRESIDENT

The University of Alberta has no president, and within a month it must open its doors for the new term. Dr. Wallace's resignation, to take the presidency of Queen's came in May and three months have elapsed without any appointment being made. Under the University Act, the appointment is made by the provincial government, and while there have been rumors to date, there has been nothing more. In commenting on the question in its June 3 issue, the Advocate said:

"Premier Aberhart, in selecting a successor to Dr. Wallace as president of the University of Alberta, would do well to look within the ranks of the present faculty. The University of Alberta has been fortunate in other things beside its presidents, and on the faculty today are men of distinction in many fields. Three members of the staff were honored the other day in Ottawa by being made Fellows of the Royal Society of Canada, an unusual tribute to these men and indirectly, of course, to the institution of which they are a part. One department head has been with the University during the whole twenty-eight years of its life, others have twenty-five years and more of service to the school and to the province behind them. Their knowledge of the problems peculiar to the college and to the province is naturally greater and more detailed than could be found in anyone brought in from outside. Several of them have proven administrative gifts, and the Premier might well select an Albertan to head an organization which should play a decisive part in making Albertans."

There is good reason to believe that an appointment from the present staff would be welcomed by both faculty and students, and an appointment should be made at once to give the incoming chief a chance to find his feet before the term opens.—Red Deer Advocate.

ABERHART AND
THE NEWSPAPERS

Never in the history of Canada has any private industry been subjected to such an attack on the part of a Government as is now being waged against the independent press of Alberta by Premier Aberhart, his Ministers and the Social Credit members of the Legislature. Day after day, week after week, these 56 paid servants of the people are going up and down the Province exhorting the people to put the independent press out of business. The fact that the newspapers of the Province employ hundreds of people has no weight with these Legislators. Knowledge that the newspapers exist by reason of the fact that the newspapers are heavy taxpayers means nothing. Put them out of business at any cost is the motto of the Aberhartians; the press must be "controlled;" there must be no independent press in this Province.

The Herald very much doubts whether the people of this Province are in favor of their paid servants going up and down the country trying to put legitimate industry out of business.—Lethbridge Herald.

The only objection to the "wages of sin" is that other people don't get paid off soon enough.

PREMIER ABERHART
ET AL PLEASE NOTE

It is like a breath from heaven to hear from the lips of Premier Hepburn of Ontario the statement that "he could not call to mind any particular case of misquotation. He had been in politics for eight years, four of which were spent as a member of the dominion parliament." And he added:

"I have never had any difficulty with the newspaper men. I have always found them fair in their reports."

Anyone who knows Mr. Hepburn knows that he often speaks his mind in moments of stress, saying things he perhaps wishes afterwards he had not said. But he doesn't go about reviling newspapers and newspapermen for reporting what he actually did say. And he doesn't charge the newspapers with deliberately misrepresenting him.—Ex.

THE MOST IMPORTANT LETTER

Someone has advanced the opinion that the letter "e" is the most unfortunate letter in the English alphabet, because it is always out of cash, even in debt, never out of danger and in hell all the time. For some reason he overlooked the fortunes of the letter, and we call his attention to the fact "e" is never in war and always in peace. It is the beginning of existence, the commencement of ease and the end of trouble. Without it there would be no meat, no life and no heaven. It is the centre of honesty; makes love perfect, and without it there would be no editors, devils now news.

"My shaving brush is very stiff," complained Dad. "I wonder what's wrong with it."

"I don't know," said wifey. "It was nice and soft when I painted the birds cage yesterday."

Frank Graham, who for around fifty years has cared for cranium, beautification and chin trims at Cole, the man living returned from a summer holiday trip, covering a distance of some 3,000 miles in two weeks. He was accompanied by his son Donald. As a result of the trip, Frank looks about twenty years younger.

The following item set up and given space in our last week's issue still stands good: The United Church annual congregational and Sunday school picnic, held Wednesday afternoon near Burns' Creek proved most enjoyable. Children were transported to and from the grounds by car, and thoroughly enjoyed themselves.

Calling out that there had been an accident, three masked men gained entrance to the living quarters of Fred Lombard, United Grain Growers' agent at Barrette; then, threatening to torture his wife, forced him to open the safe and hand over \$600 of company funds. The trio are still at large.

Mr. Steve Berry, of Bellevue, who was one of the pioneers of Redcliff, spent yesterday in town calling on old friends. He was accompanied by his daughter and son-in-law, Mr. and Mrs. V. Motte. Steve is a little whiter since we saw him last, but he is the same jovial good-hearted Steve and as spry as ever.—Redcliff Review.

One hundred fire fighters are still in camp at Cardinale River, operating under direction of Rangers Kovach and Bolton. In addition to this crew, there are about fifty others doing road and bridge construction work between Young's Hill and Webb creek. Fires are now well under control, although the rains of Monday and Tuesday failed to reach the fire region.

Local business people should soon wake up to the fact that when it comes to advertising The Blairmore Enterprise only has the guaranteed circulation. When three hundred copies are circulated right in the town of Blairmore to genuine subscribers, there are not many homes missing it. And we do not peddle that stuff usually termed "bull."

Local and General Items

The best people are the ones your wife knew before she was married.

While an Ontario ram was being sold for \$1,000, bull was being peddled in Alberta absolutely free.

Should anyone in the Little district notice a bear coughing up a spring lamb, that lamb would belong to Charlie Sartoris.

A Chinese boy who about two months ago did not know a word of English, can already spell knife in the simplified way: "Nife."

Oh, what a relief! Mr. Aberhart states that no more taxes are to be imposed upon the long-suffering people of this province.

Six members of an eastern class have passed their examination in public speaking. They graduated from a barber college last week.

A young lady gave as her reason for sleeping beneath trees that she had heard that dyes came from trees, and her hair was a hateful color.

Lily Wong expects to have as her guest this week Miss Fanan Quon, of Winnipeg, Alta. Miss Quon started even newspapers last spring, for she is only 16 years of age, but in first year medicine at Michigan University, she passed all subjects with 100 per cent standing.

Road gangs under government foreman McKay have been doing some good work on the main road north of Lundbreck, particularly in the road near the McLean ranch, and on the mile-east section from the Wild Cat ranch. At the latter point, the dip at Todd Creek bridge, which in the winter has always accumulated sufficient snow to make it just about impassable, is being practically eliminated. The hills on either side are being dredged to the dip.

Tooth-brush bristles come from hogs' hides, and are imported principally from China, Russia and Japan. Before they can be used for dental hygiene, however, they are graded, washed, bleached and sterilized. The colored handles are made from a pyroxylin plastic material known as pyralin, which arrives at the factory in large brightly-colored panels. A perfectly synchronized machine first drills the holes, the folds, each tuft of bristle in half and anchors it in place with a strip of nickel.

A friend of the owner of a string of horses asked if he might see them. The owner, being very proud of his horses, was delighted and took his friend to the stables. The friend went along the stalls and lifting up the tail of the first horse, ejaculated "Good Lord!" lifting the tail of the second, "Heavens!" and so on. The owner, never having seen a horse examine in this way, wanted to know what the idea was and his friend's reply was "Just curiosity, I have often been called one of these."

A wedding is a great idea. No married couple should be without it.

Men and women are to be allowed to sit together in boxes in theatres in Manchuria, but not in the galleries.

A local guy, after visiting friends in Nova Scotia, attempted to cross Canada with a half-ton sturgeon in his suit case.

Women golfers in the foursomes final at Hurnberry were stymied on the seventh green. A field mouse ran across and stopped in front of the hole. Spectators and players ran.

Some posters around town, announcing a dance and supposed to be a work of art, might just as well have been written or printed in Chinese. The public nowadays do not want to waste time "trying" to read.

An account of a marriage in a Nova Scotia paper carried as heading: "A Happy Ending." Reading the article, we discovered that what was meant was his race for a life partner had been successful.

With a rope around his neck and to be dragged several blocks was the experience of a Blairmore policeman yesterday morning. And the poor guy never uttered a word of protest. Of course, the officer was built of solid cement.

Roy Buchanan, of the Buchanan ranch, near Cowley, is lying in a Pincher Creek hospital in a serious condition, following an accident that occurred Wednesday evening about dusk. It seems he was carrying a gun, when he tripped over a dog. The gun discharged, the bullet penetrating his arm. He may lose the arm.

The Fernie Free Press knows of a man who was so lazy that he married a widow with five children.

A man knows where to find his things after his wife has given a party. Just go to the clothes closet and dig through the pile on the floor.

Fish, we are told, tend to give a man courage. We heard the other day of a week little boarding house dinner speaking up and asking for another sardine on his toast.

Since the forest fires along the east and west slopes of the Rocky Mountain range, coyotes and bears are reported plentiful in this district. A number of sheep from flocks pasturing north of here have been destroyed during the week, both bear and coyotes being held responsible.

BELLEVUE HAPPENINGS

B. Goodwin, who had been attending summer school at Edmonton, returned home on Saturday. Tony Schmiedl, who had been visiting at Creston for the past two months, returned home over the week end.

Mr. and Mrs. James Radford and sons James and Fred left Sunday for a two weeks' vacation.

Charles Bloomfield, of Calgary, spent the week end in town, the guest of Mr. and Mrs. W. Goodwin.

Miss Dorothy Barlass, of Calgary, is visiting her parents, Mr. and Mrs. Herbert Barlass.

Mr. and Mrs. E. C. Cosstick and from their vacation in Edmonton this week.

Mrs. P. Korns and son left Saturday to spend a holiday in Fernie.

Mr. and Mrs. Fred Utley and children returned last week end from a two weeks vacation.

Miss George Cousins, of Penticton, B.C., is a visitor with her parents, Mr. and Mrs. Joseph McLean.

Miss Erna McDonald returned Saturday night from a two months' holiday spent in Nova Scotia, Boston and other U.S. points.

Mrs. W. Beck entertained a number of young people at her home on Friday afternoon.

Mr. and Mrs. N. McDonald and two daughters, accompanied by Mrs. Clyde McDonald and son, returned this week from a vacation spent at Vancouver.

Mr. and Mrs. J. McAndrew and son Douglas spent a couple of days here with their daughters, Mrs. A. Goodwin and Mrs. B. Eccleston. They were accompanied on their return to the city by their daughters Margaret and Eleanor, who have been here for the past two months.

Mr. and Mrs. J. Shevels and Joe returned Sunday from two weeks spent in Vancouver.

Mrs. R. Cummings and son are visiting with Mrs. Cummings' parents, Mr. and Mrs. E. Litherland.

Miss Freda Wolstenholme returned Sunday from a holiday spent at Vancouver.

Mr. and Mrs. D. Morris returned Friday from a two weeks' vacation spent at Lacombe and Sylvan Lake.

Mr. Chris. Stevens and son David, of Victoria, have been visiting old friends in the Burnside and South Fork districts. After spending a few days at Tenth's, and a few more with Mr. and Mrs. B. Price, their former next-door neighbors, and the Cossticks at Bellevue, they left to return home on Wednesday of this week, having very much enjoyed their visit.

Fashion Service

By JANE DLE

ARE you one of those amateur dressmakers who is interested in the latest fashions of the day, who wants to be well dressed yet hasn't the time or opportunity to shop around?

Why not take advantage of the Eaton's service offered to you by EATON'S? All you need to do is write to me at Winnipeg and I will gladly help you solve your fashion problems.

Perhaps you are in doubt as to what the new colors, fabrics and fashion trends are for Fall. Maybe you are going to some social gathering and would like advice regarding the correct frock for the occasion. If you have a new dress or coat and are not sure what type of accessories you should wear with it, just describe it in your letter and I will try to give you several helpful suggestions.

Remember that this service is available through EATON'S Winnipeg Mail Order. Also that it is not a Shopping Service. I act solely in an advisory capacity.

Jane DLE

EATON'S

HILLCREST HAPPENINGS

The funeral of the late James Calderwood took place on Friday morning. Services were held in the United church and at the graveside. To mourn his passing, he leaves two daughters, residing in Vancouver.

Danny May, of California, is visiting at the home of Mrs. G. Porteous, and is renewing old acquaintances here.

Miss B. C. Sellon and Miss Margaret Grant returned Tuesday from Vancouver, where Miss Sellon had been attending the university summer session.

Miss J. Wood and family returned from their vacation in Edmonton this week.

Mrs. and Miss Martin returned from their motor tour to U.S. and coastal points last week. They were accompanied by Miss E. Strachan.

Miss Ruth Moyle, of Edmonton, has been a guest of Mr. H. Stobbs.

James Lawrence, aged 31, passed away in the local hospital on Thursday, following a short illness. The funeral service was held in the United church on Saturday, and the remains were laid to rest in the Hillcrest cemetery. Mr. Lawrence leaves to mourn his passing his wife and infant daughter, also several brothers and a sister, residing in Calgary.

Mr. E. Fisher has been visiting in Calgary.

Mr. and Mrs. W. Webster and family returned Monday from their holiday spent at Mountain View.

Mrs. McKenzie, of Great Falls, Montana, is visiting at the home of her parents, Mr. and Mrs. B. Carter.

Mrs. Sinclair, who has been the guest of her sister, Mrs. R. Gardner, for the past few weeks, left on Tuesday for her home in Cleveland, Ohio.

Mr. and Mrs. W. Brushett and Teddy returned Sunday from their holiday spent in Edmonton.

Mrs. D. Lockhart and children, of Fernie, spent a few days with her parents here, Mr. and Mrs. J. Makin.

Tom Beynon returned from a motor trip to the coast.

Miss Eva Shareta, who has been holidaying in Vermilion, returned Sunday to resume her teaching duties.

Mr. H. O. Westrup is a Calgary visitor this week.

Mrs. M. Hamaluk and Dolly spent an extended holiday in Saskatoon.

Mr. and Mrs. Jacks of Edmonton, are guests of Mrs. Walter Rose.

Jack Graham, of Coaldale, was a business visitor here last week.

Miss Bessie Davies returned from Calgary on Tuesday.

Mr. and Mrs. J. Ironmonger, senior, and family returned by auto to Vancouver last week.

Miss Annie McDonald, of Blairmore, has been visiting at the home of Mrs. W. Adlam.

The Rotary Club will operate the Fernie rink next season. The rink owners will deed the property over to the city, who will in turn hand it over to the Rotary Club to be operated in the interest of the young people.

Some here, brother! The Vulcan Advocate remarks that "although the number of electors registering for social credit dividends is of vital importance to everyone, yet the persons in charge of the Vulcan registration

would not make any statements to the press. They just won't talk." We were told here that any information could not be given out without direction or permission from "The Big Guy." Great, isn't it?

The municipal district and town of Athabasca decided to accept Alberta scrip in payment of current and arrears of taxes, and in full for water rates. A limit of \$1,000 worth of scrip was set for the council to accept.

The scrip as accepted is to be re-issued, as far as possible in payment of day labor and municipal purchases from town merchants.

It is to start with a three months' trial. The whole move was motivated by a desire to try to co-operate with the Alberta government. Two members

COWLEY HAPPENINGS

Mrs. Elsie Duffield is spending a few days this week in Pincher Creek. Mr. and Mrs. Matthews and daughter Elaine were visitors to Clareholm over the week end.

Miss B. Parasel, of Lethbridge, is spending several days as guest of the Misses Wood. She is employed as teacher at the Turin village school.

Sandy Leslie returned home on Tuesday of this week from a business trip to Calgary.

Miss Mary McKay paid a visit to Mr. and Mrs. Pitman at High River for a few days recently.

Albert Hutton, of Hanna, is spending a week's holiday with friends in Cowley.

Mrs. "Scotty" Wells and her twin sons, Alex and Stanley, of Bellevue, were visitors for a few days with Mr. and Mrs. Robert Littleton.

Miss Avis Horning has returned from Banff, where she took a special three weeks' course in art, under supervision of the University of Alberta.

A number of Cowley young folk attended the dance at the Tanner school house on Friday night, and report having had a very enjoyable time.

Rev. J. Wood, of Hillcrest, will conduct services in the United church on Sunday next at 11 a.m.

After ranching in the Maycroft district for a number of years, Jack Hays and family are moving to Warhola, in the Peace River country.

Mrs. Hays and children left by truck with household effects for their new home on Tuesday. Mr. Hays will join his family a few weeks later.

On Sunday last John Carney, another of Alberta's pioneers, died in St. Vincent's hospital at Pincher Creek. Mr. Carney came from London, England, around the year 1900 and settled on a homestead a mile west of Cowley with his wife and children. After residing in this district for a number of years, the family moved to Bellevue, where he resided until death.

A large congregation attended the United church on Sunday evening last, when Mr. W. Dutton, of Blairmore, held a special service. The congregation

were much pleased with song selections rendered by Mrs. Upton, of Bellevue, and Mr. and Mrs. Dutton.

After preaching an able discourse,

Mr. Dutton had song sheets passed around, when all joined in praise as they hastily sang several selections.

The meeting lasted two hours and was thoroughly enjoyed.

Coming to Blairmore on Thursday for the funeral of the late John Carney, a car of relatives and friends met with an accident near Lundbreck. One or two of the party sustained slight injuries. On account of the accident, the funeral scheduled for 1 p.m. was delayed for upwards of an hour.

The marriage of Miss Maureen, daughter of Mr. and Mrs. Maurice Cooke, of Coleman, to Mr. Robert Love, son of Mr. and Mrs. J. Lowe, of West Coleman, was solemnized at St. Paul's United church on Friday morning last. The young couple will reside in Coleman, where the groom holds a position with the International Coal Co.

Michael D. McLean, one time member for East Kootenay, won a \$3410 judgment in supreme court against the Vancouver Harbor Commission for wrongful dismissal. McLean sued under a contract employing him for five years as superintendent of the terminal railway. His contract was dated December 1st, 1932, and December the 10th, 1935, he was given notice that his employment would terminate March 10th. Mr. Justice Robertson allowed McLean his salary at \$350 a month and assessed subsequent damages at \$2100. A claim by McLean for \$1178 arrears of salary, being the amount deducted after the pay of civil servants was reduced, was disallowed, the court holding that his contract did not except him from the effect of the "Salary Reduction Act." McLean testified that he had not worked since his dismissal.

Local and General Items

Furriers sell sheepskins under fifty different names.

Instead of hanging an editor, they are going to hang his portrait in an art gallery at Toronto.

An exchange says: When a government won't take its own money, it should not call other people names for not taking it.

A correspondent wants to know the best way to prevent water coming into the house. Now, that's easy—Don't pay the water rate.

A local party, cleaning a shotgun a few days ago, extricated a brand new blue-upright dry flyhook from it. It is believed to have rebounded from the last fish that was shot.

A south Blairmore couple, returning to their homes after having registered for Social Credit dividends, were met by their little son at the front gate with the query: "Did you git the money, Dad?"

The "Jacobs-staf," the instrument used by early Dutch navigators in their adventurous voyages, has been selected as the crest and emblem of the fifth World Scout Jamboree, to be held in Holland in 1937.

A large and appreciative audience greeted William Gallacher, sole Communist member of the British House of Commons, at the Columbus Hall on Wednesday evening. Mr. Gallacher arrived by the 6 p.m. bus and left next morning for Drumheller.

A Chinese weekly paper, to be circulated among 45,000 Chinese residents in Canada, is to be published in Vancouver. Keith S. Wiles, London University graduate, will be editor, and M. Cheolin, graduate of Shanghail college, managing director.

Now, again, the question is being raised: "Are tenants taxpayers?" Well, the answer might well be: "Yes, providing they are paying rent." Many a tenant has been privileged to vote who never once met his obligations to his landlord.

FOR SALE

A HOUSE THAT IS DIFFERENT—Nearing completion. Modernly equipped. Six Rooms (three bedrooms, living room, dining room, kitchen), bathroom, breakfast nook, large basement, full plumbing and furnace. Terms \$500 cash and time payments.

Sports programmes for the field events in connection with the nineteenth annual show of the Bellevue and District Horticultural, Industrial and Poultry Society, to be held on Labor Day, September 7th, have been donated by The Enterprise, together with a list of special prize awards for the show.

A house on State street, between Eighth and Ninth Avenues, was sold during the week by Mr. A. S. May to Geo. Patterson, who had same move over to the southeast corner of the town. Mr. May will now be in a position to beautify his home, which will occupy three lots, instead of two as formerly.

Now that you can grow potatoes without soil, why not plant a few sacks in the corner of your trunk?

The greatest bulk of errors was reported in a batch of Bellevue items contained in Saturday's Albertan—scarcely an item correct.

The Blairmore School Board has discontinued the use of the United church auditorium as a classroom. Instead, provision has been made for accommodation of that class in the basement of the central school building.

Mr. Peterson, of Calgary, temporary foreman of relief camp 15 at the South Fork, east of Cowley, was found hanging to a beam in his office on Saturday morning last. The body was discovered by one of the camp workers. He is believed to have hung himself at a late hour on Friday evening.

Large numbers from this district availed of the first opportunity for about four weeks to last week end to visit the upper waters of the North Fork, and some excellent catches of trout were brought back on Saturday and Sunday evenings. Roads are in excellent condition, river waters are low, and camping is just ideal.

The Lethbridge Herald remarks: "If our barber quits talking just because he is trying an examination—with five dollars at stake—we won't know him when we meet him again." Well, the answer might well be: "Yes, over to the southeast corner of the town. Mr. May will now be in a position to beautify his home, which will occupy three lots, instead of two as formerly. Of course, he was a dummy."

The Search For Economic Safety

One frequently hears it said nowadays that the subject of economics should find a place, and an important place, on the curriculum of the public and high schools.

The proposal has arisen, no doubt, out of the depression from which the countries of the world have been suffering and their populations groping, more or less in the dark, in the hope of finding a way out of the financial and economic difficulties which are besetting them and from which apparently a slow, but is to be hoped a sure, emergence is in progress.

It is urged that matters pertaining to currency and credit are complicated and that the average person arrives at the so-called age of maturity and discretion with very little knowledge to guide him on topics which, after all, are of great importance to everyone. Even the fundamental principles are obscure to the average man, and they apply not only to the farmer on the land and the merchant in the country store, but to the average business man in the larger centres.

It is pointed out that after all it is the average elector who must decide what is best for his country, his province or his community must take thought what the greatest majority is an uncharted sea, at any rate uncharted and unknown so far as they are concerned. It is the average elector who goes to the polls and gives direction, through his vote, to his representative who naturally feels that it is incumbent to carry out the mandate thus conferred upon him.

And in recent years, as a result of general and local conditions, these mandates have largely taken the form of instruction as to what policies should be pursued in regard to questions respecting the uses of currency and credit and the forms they should take. These have lately become important issues in elections, both in restricted community areas as well as in the wider provincial and national fields, not only in this country but in the majority of countries in the civilized world.

Thus being the case, it is highly important that the electorate should be well posted on at least the fundamental principles underlying the various economic theories presented for their approval or rejection and as to whether or not they are feasible. When new experiments in financing are proposed the elector should have some knowledge as to their feasibility or otherwise and some history, if such is available, to guide them as to the results of similar experiments in the past and elsewhere.

Unfortunately this is not always the case. One hears a great deal of discussion on economic topics wherever groups are gathered together. Some of the contributions to these discussions are based on sound facts and known principles and some, on the contrary are based on pure theorization and largely inspired only by a very natural desire to try something which may prove a success.

But unfortunately, however, there is always the risk of an uninformed elector, or an electorate not well grounded in fundamentals, rushing into some experiment which might prove to be disastrous in its effects and result in stepping "out of the frying pan into the fire."

These statements are not made with the intention of decrying experimentation in the economic field. On the contrary. The world and conditions in the world are changing almost daily. Progress must and will be made in this as in other spheres of life. In the field of medicine, in the field of science and in other departments of life, enormous progress has been made in recent years, and largely as a result of experimentation, but usually it will be found that this progress has resulted by moving forward step by step along the path of construction on accepted fundamental facts. In these fields results are usually only achieved by workers who know and understand basic principles.

Fortunately the public is awakening to a realization that if they are to guide the destinies of themselves and their fellows successfully in the economic sphere they must have a grounding of reliable information on which to base their conclusions and to apply as tests. This is demonstrated by the tremendous increase in the sale of books and pamphlets on these and kindred topics in the last few years and in the increased demand for such works at the public libraries.

The greatest immediate danger that exists in this widespread demand for information is the possibility of confusion on the part of readers who are bombarded on all hands with innumerable theories; but this danger may be avoided or at least partially offset, if the reader will search for definite proven facts, in the light of history and experimentation, and proceed from there to build his conclusions as to what may be safe and what dangerous.

The proposal to make economics a more important subject of study for the month of day to day economics has considerable merit, but until a new generation is grounded in fundamental and practical principles, the adults who are being called upon to determine policies for present day adoption must necessarily continue to seek guidance from available literature plus their own good common sense.

The Coronation Procession

Route As Arranged Will Be Longest On Record

Official announcement of the route to be taken by the king's coronation procession on May 12, 1937, showed the drive to and from Westminster abbey would be the longest on record, covering nearly twice the distance of the coronation route taken by the late King George.

The route will traverse no street twice, thus giving the enormous crowds expected from home and overseas ample opportunity to see the pageantry.

The route from Buckingham palace to the west entrance of Westminster abbey will be by way of the Mall, Trafalgar square, Whitehall and Parliament street. The return journey will via Victoria embankment, Northumberland avenue, Cockspur street, Pall Mall, St. James street, Piccadilly circus, Regent street, Oxford street, the Marble arch and Hyde Park corner.

Hoof Platinum For War Use

Japanese women adorn their fingers with platinum rings in peace time, so that there shall be a large reserve supply of these articles in case of war. The rings are sold under the direction of the "Japan Platinum Popularization Society."

A woman residing in Durham, England, is reported to wear size 21 shoes.

Must Obey Or Suffer

Small Wonder Russians Do Not Particularly Happy

Hon. W. D. Ender, Canadian minister of trade and commerce, has been looking forward to Moscow and Russia. On a purely business mission, his observations are naturally confined to generalities. But he did comment on the fact that in Moscow, greatest of the Soviet's cities, the people did not look particularly happy. If this sounds like a trite remark, it nevertheless comes from a man who is well accustomed to sizing up crowds in a realistic way. There is value in this. It is a relief from the more familiar and more scientific analyses of Russian systems and developments.

Whatever their benefits and ideals, the people of Russia to-day are forced to follow a mode of life and work set by a small dictatorial group at the head of the state. It is not for them to complain that it is not the way they would choose; they obey or they suffer.—Hamilton Spectator.

Inscription Is Brief

The briefest inscription which has ever appeared on a field marshal's baton is on that which the Duke of Connaught, as senior Field Marshal of the British Army, handed to his great-nephew, the King, at Buckingham Palace. It reads simply, "His Majesty King Edward VIII., Field Marshal, January 21, 1936."

The Champion Loser

Man Who Lost Millions By Selling Stock Too Soon

Among the many romantic aspects of the colossal growth of the Ford Motor Company nothing is stranger in all the history of finance, perhaps, than the large fortune made by Henry Ford and Alexander Malcomson, who was Ford's principal backer. Senator Couzens made 29 million dollars; poor Malcomson cheated himself out of close to 300 millions. Instead of becoming one of the world's richest men, he sold his stock for a mere pittance.

The Ford Motor Company was incorporated on June 16, 1903. Fifty-one per cent. of the stock issue of \$100,000 was split evenly between Henry Ford and Alexander Malcomson. Among the other stockholders were Couzens, at that time only a clerk in the coal business conducted by Malcomson, who subscribed \$2,500 and the Dodge brothers, John F. and Horace E., who contracted to build the Fords in their machine shop and who each got a \$5,000 interest in the Ford Company.

In 1906, Malcomson sold his \$25,000 worth of stock to Ford for \$175,000 and probably thought he was doing well. He was not, however, for Ford had increased his original investment six times in three years. But wait—Couzens hung on until 1919, a year in which the company's profit was close to 70 million dollars. The Ford family bought Couzens' stock of \$2,500 and paid him \$9 million, 308 thousand dollars for it. He was the last minority stockholder. Had Malcomson not sold out till then, he would have drawn out just ten times as much as Couzens did; or approximately 300 million dollars.

Malcomson thus must go down in financial history as the toughest loser on the books; as a man who stood to gain the largest profits on record but didn't have the patience or the wisdom to wait thirteen years longer.

Dream Highway Progressing

Proposed Road Between Alaska And South America Being Developed

The "dream highway"—a good road from Fairbanks, Alaska, to Buenos Aires, South America, 12,000 miles away—is being developed, but there still remains plenty of mileage to fill, of which the missing sections in the mooted British Columbia—Alaska road are a major part.

A tourist from Vancouver can now drive over well-paved roads as far as Mexico City, 1,500 miles, or little more than one-quarter of the mileage that will be available for him when the Pan-American highway is finally completed. The same highway, however, extends an additional 836 miles northward in British Columbia to Hazelton, B.C.

One of the first definite links to be completed will be from Mexico City to Panama, of which 165 miles to Techucan is already passable by motor.

Another difficulty in the making of the highway will be the construction of a road over a 400-mile stretch of jungle and mountain from Panama City to the Colombian border in South America.

South America has considerable stretches of excellent road, with occasional rough and rugged patches. In Peru the government laid down 2,000 miles of good road from the northern border of Chile. From there to Santiago in Chile the motorist can travel on another highway 1,577 miles.

From Santiago, a road leads eastward over the Andes mountains, a highway constructed under incredible difficulties and open only in summer. At Mendoza in the Argentine this road joins the Argentine section of the highway which carries for 850 miles to the southern terminus of the "dream highway," Buenos Aires.

Stages A Surprise

Geyser In Yellowstone Park Bettered Its Own Record

The longest and shortest intervals between eruptions of Old Faithful Geyser were recorded at Yellowstone Park, Wyoming, recently. The usually reliable geyser spouted once at 11:56 a.m. and then burst into action again at 12:26 p.m., a wait of only thirty minutes. Then followed an interval of 92 minutes, or until 1:56 p.m. Old Faithful seldom erupts from 65-minute intervals between outbursts.

What nation produces the most marriages?

More than 8,753,000,000 pieces of mail passed through the British post office department in the last year.

England's average annual income per capita is about \$250.

Predicts Long Drouth For U.S.

Weather Man Would Move 50,000 Families From Dry Areas

Migration of 50,000 families from the drought-damaged farms of the west central part of the United States was recommended in a population survey of that area by Dr. C. W. Thornthwaite, former University of Oklahoma climatologist.

His study, published by the University of Pennsylvania, contended wind erosion had damaged 65 per cent. of the plains region, extending from the Canadian border into the Texas Panhandle.

A long-range government program for the return of millions of acres of wheat land to its native sod, he said, might be the only means of checking the devastating dust storms.

Observing long dry spells have been frequent in the history of the plains, Thornthwaite predicted "the present drouth might be prolonged for 20 or more years."

Evidence from tree rings, lake levels and other sources was cited in the survey to show a 40-year drouth in the 1890s had been interrupted by only occasional wet years.

But the weather expert estimated that a minimum of 12,610 families should move out of Montana, the state in which he reported the greatest "surplus population." He urged a migration of 12,200 families from Texas and 7,369 from North Dakota. Heavy removals also were suggested for South Dakota, Nebraska, Kansas, Oklahoma, Wyoming and Colorado.

"The ideal situation in the great plains," he said, "would be a practically complete return to a grazing economy where pasturing on the range is supplemented by the raising of feed and forage crops."

Newspaper Favors

Many People Who Are Expecting Something For Nothing

We have often reflected upon the slowness of people to thank editors for the favors which newspapers do for them. Individuals and organizations are constantly asking for publicity to assist them in promoting various kinds of worthy causes. Space is the only commodity aside from circulation which publishers have to sell, and this is a fact which too many forget for a moment. Some are even critical of the favorable notices which we give them and their projects. A still greater number forget to make any acknowledgment of the courtesy extended to them. We have in mind a biblical instance of ingratitude in which only one in 10 was thoughtful enough to return with thanks on his lips and in his face.—Toronto Mail & Empire.

All Of Same Make

King Edward's Car Thirty-Seventh Made For British Royalty

The first royal car in the world—it is still in running order—was a 6-horse power one supplied to King Edward VII., then Prince of Wales, in 1899, states the Overseas Daily Mail. From that year the Kings and Queens of England have owned thirty-six state cars, all of the same make. King Edward's new car is the thirty-seventh. The last big car used by King George was made specially for his Jubilee tours in London.

SELECTED RECIPES

UPSIDEDOWN CAKE

Place 2 tablespoons butter and 1 cup brown sugar in well-greased pan and heat until sugar is dissolved. Cool and place layer of pineapple, apricots, peaches or any other cooked fruit in syrup. Sprinkle with coarsely chopped nut and cover with following batter:

½ cup butter
½ cup fruit sugar
2 eggs
½ cups flour
½ cup milk or fruit juice
3 teaspoons baking powder

Had Ballots In Pocket

Ihada Judge Was Too Busy Ploughing To Count Votes

After many fruitless telephone calls, unofficial calculators of the primary election reached the wife of a precinct judge in remote southeastern Idaho.

The returns? No, she was sorry she didn't have them. She didn't think Henry had counted the votes yet.

"It's out plowing and has the ballot in his oversalls pocket," she explained. Henry was in a field 10 miles from a telephone.

Most Unusual Catch

Topping the unusual catches of veteran anglers fishing Quebec waters this summer are a pair of Siamese twin fish recently displayed in Montreal. The fish, members of the guppy family, are getting along well together.

The advantage of using a taxi is that you feel so happily neutral when a fender is crumpled.

DIXIE is the thrifty man's smoke. You cut it as you use it and the plug remains fresh to the last cut.

Football Fans Defy Fire

Firemen Had To Force Them From Grandstand In Australia

Three thousand football fans sat and waited in a grandstand in Sydney, Australia, and engrossed in the game, they refused to move until forced to do so by firemen. A few minutes after they had left flames burst through the floor. Until the firemen acted the game continued despite the fact that clouds of smoke were blowing across the field.

"Opportunity knocks for every man." A woman gets a ring.

Save "LEFT-OVERS" with

Appleford's
Presto PACK WAXED TISSUE

MORE CONVENIENT TO USE...

Just hang a package in your kitchen. You'll be delighted with its convenience... for, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped.

Warehouses at Calgary, Edmonton, Regina and Winnipeg

CIVIL WAR IN SPAIN IS BLAMED ON THE LEAGUE

Durban, South Africa.—General Jan Smuts, deputy prime minister of South Africa, blamed the civil war in Spain on the League of Nations' handling of the Italo-Ethiopian dispute and declared the situation in the Mediterranean "more dangerous than ever before."

"It looks upon the revolt in the Spanish army in Morocco and the civil war in Spain not only as a most dangerous symptom in itself but also as another product of the breakdown in co-operation in the League of Nations during the Italo-Ethiopian crisis," the South African statesman declared in an interview with *The Natal Observer*.

"I am sure the Spanish business is closely connected with the Italian business and that the two together have created a situation in the Mediterranean which must necessarily give the greatest concern to all Mediterranean powers."

General Smuts said that if France and Britain had stood firm in the Italo-Ethiopian crisis and had seen the league through, the position in the Mediterranean would now be safer for both. The league would have proved itself and become a solid bulwark against revolution and aggression. Not only had the breakdown of the league resulted in the Mediterranean situation but in a wild armaments race.

"I frankly admit that rearmament may seem the only alternative after desertion of the league and abandonment of the policy of collective security," the former Boer leader declared. "The whole economic position of Europe is becoming a question of armaments. Unemployment is being solved in the armament factories and if this policy is reversed there again will be unemployment on a vast scale and a dangerous social position in most countries."

That all tended to prove what a far-reaching lesson had to be learned when the great powers had failed to give a decisive, firm lead in the Ethiopian business. The irony and tragedy of the situation was that the action of the great powers had been dictated by their view of the Mediterranean situation and that situation today was worse and far more dangerous than ever before.

"I am firmly convinced that only firm, courageous action by France and Britain can stop the revolt," General Smuts concluded. "Ethiopia was a grave warning and perhaps the events in Spain were of an even more ominous character. Talk about reform of the league in mere camouflage. I wonder whether it is not more necessary the important powers should come together at this moment to inform a conference which will lead nowhere."

Demand For Platinum

Has Caused Big Jump In Price Of Metal

New York.—A 23 per cent. jump in the price of platinum to \$53 an ounce from \$43 climaxed three weeks of "very unusual demand here and abroad," reliable trade circles declared.

Bulk of the metal is destined for war purposes, it was said. Platinum figures prominently in chemical warfare, battleship and surgical equipment, dealers stated.

Most of the foreign buy, the trade reported, has come from Japan.

Mining Of Wheatlands

Vancouver.—Two things in particular impressed Sir Percy Vincent, lord mayor of London, as he crossed Canada. One was the Rocky Mountains and the other, "Minerals of the prairie wheatlands." He did not think, he said on his arrival, it was agriculture to continually take from the soil without returning something adequate to it. Canada needed more people, he thought, pioneer types who could stand the first years of loneliness.

Less Wheat In Storage

Ottawa.—Canadian wheat in store for the week ending Aug. 14 was 116,393,568 bushels compared with 113,661,155 for the previous week, the Dominion bureau of statistics reported. For the corresponding week last year the total was 198,551,774 bushels.

Lower Lake Rates

Montreal.—Grain brokers reported wheat was in transit from the head of the Great Lakes to St. Lawrence river ports at the lowest freight rate of the year, 3½ cents a bushel. Early in the season the rate was six cents.

Strict Neutrality

Sir Samuel Hoare Would Keep Britain Out Of Spanish Troubles

Cromer, England.—Warning of consequences that might attend any deviation from the path of strict neutrality in the Spanish civil war, Sir Samuel Hoare, first lord of the admiralty, berated socialists who have publicly supported Spain's leftists.

"As a rule the parties of the left are pacifists," he said. "Our parties on the left are militarists, but militarists who want war without armies, navies or an air force."

"Many of them seem to want war against one of the factions in Spain. Let me say to them that the National government have not the least intention of interfering in the internal affairs of Spain or embroiling this country in a grim and detestable struggle that is not our direct concern."

"If we attempt to impose our will upon the Spanish factions, we might well involve Europe in a general conflagration. Let us rather maintain a strict neutrality."

"Lansbury (George Lansbury, veteran Labor M.P.) proposes that we should throw the weight of our country and empire into the scales on the side of one of the Spanish factions. What more irresponsible proposal could be imagined? To take side in a factional fight in Spain would mean inevitably another peninsula war with the great body of the Spaniards against us. It would mean almost certainly a conflagration that would spread from one end of Europe to the other."

"Let us learn the lesson that these events have to teach. If policies get into the hands of extremists and fanatics then the bullet and the bomb take the place of the ballot box."

"In this country" Sir Samuel added, "we needed no Fascists to fight Communists. We fought and defeated Communism by increased prosperity. We destroyed revolution, not by blackshirts, but by ordered progress and free discussion."

Increased Immigration

Figures For First Six Months Higher Than Last Year

Ottawa.—During the first six months of the present year 5,253 immigrants entered Canada, according to a report issued by the department of immigration. While slightly more than the corresponding period in 1935, the number exceeded the best year since 1913 when immigration was highest, the 12-months figure was 382,841.

Most of the immigrants this year were women and children of men already in Canada. Adult females totalled 2,163, children under 18 years 1,853 and adult males 1,236. The immigration for the corresponding period last year was 4,961.

There was a slight falling-off in immigrants from the British Isles and the United States and larger contributions from the 48 other races from which Canada drew population.

Reception In Ottawa

Plans Being Made To Entertain London's Lord Mayor

Ottawa.—An official delegation to Sir Percy Vincent, lord mayor of London, on his return journey will be held on parliament hill on Sept. 2, it was announced by Prime Minister Mackenzie King.

Ottawa's mayor and civic officials will be asked to join in the ceremony.

Mr. Mackenzie King will take the lord mayor on a tour of the city and will entertain him at a luncheon to which will be invited members of the privy council, civic officials, and other distinguished citizens.

Another Sea Monster

Port-Au-Port, Nfld.—Fishermen of this town asked the Newfoundland department of natural resources to send a boat to kill a sea monster that threatened to destroy their gear. The monster, reportedly 200 feet long, but otherwise vaguely described, was said to be a sea serpent.

No Election In Sight

Sydenham, Ont.—Premier Hepburn told a Liberal picnic here there would be no election in Ontario "for some time to come." The statement was in reply to a challenge by Hon. Earl Howe that he go to the country next year.

Oldest Indian

Orillia, Ont.—Oldest Indian of this district, Peter Big Wind, hereditary chief of the Ojibway Indians, the remnants of which reside at Rama reservation, celebrates his 97th birthday. In the centre looking on is Judge Rimmer, of the district court at Arcola, Bask.

Receive More For Crop

Alberta Farmers Will Have Larger Returns Than Last Year

Edmonton.—Farmers of central and northern half of Alberta are likely to receive \$14,000,000 more for this season's wheat crop, if safely harvested, than last year's crop brought, according to an estimate made here.

In 1935 the northern and central areas harvested 44,000,000 bushels with an estimated value of \$22,000,000. With 45,000,000 bushels estimated in the same area this year and present prices ranging around 80 cents at country points the value will be \$23,000,000.

About two-thirds of the wheat cut-out of Alberta in 1936 will apparently be reaped in the northern half of the province, whereas last year the southern half had almost one-third more than the north.

Harvest which started 16 days earlier than last year, with an average date for the northern half of the province of Aug. 8, and was halted at the weekend by rain has been resumed in Edmonton district. Rains will greatly help green feed and ease the shortage of fodder for livestock held in some parts.

BRITAIN PLACES AN EMBARGO ON EXPORT OF PLANES

London.—The government of Great Britain clamped an airtight embargo on the export of both civil and military planes to either of the Spanish belligerent factions.

In ordering the embargo the government stressed the critical importance of non-intervention in the Spanish civil war.

The action was described in authoritative quarters as demonstrating Britain's earnestness by going a step beyond the limitations laid down in the original agreement to French neutrality proposals.

It was pointed out Britain previously had agreed to prohibit export of planes to Spain only if the other powers pledged themselves to do likewise.

Now, however, it was said in Whitehall, the government is spurred by realization the peace of Europe is being endangered by "technically legal" supply of civil planes to Spain—also by the delay in reaching a unilateral policy of non-intervention because of quibbling over types of aid.

The British announced a blanket embargo listing 20 varieties of war material including private aircraft.

Offers Help For Eskimos

San Francisco Trader Willing To Take Food To Arctic

Barrow, Alaska.—Asserting it was uncertain whether an emergency government food supply would arrive here in time to meet the needs for the winter, Dr. Henry W. Great, medical missionary, reported a trader had offered to land \$30,000 worth of food to relieve 500 starving Eskimos along the Arctic rim.

The missionary said the food offer was made to the Indian bureau office at Juneau by Captain C. D. Pedersen, San Francisco trader now in the vicinity of Herschel Island.

"A message from Captain Pedersen reports many people will starve if Barter Island, barring the arrival of ample relief," said Dr. Great.

Barter Island, 275 miles east of Barrow, and Demarcation and Herschel Islands were reported as the worst affected areas.

WILL SPEAK IN CANADA

Alberta Farmers Will Have Larger Returns Than Last Year

Edmonton.—Farmers of central and northern half of Alberta are likely to receive \$14,000,000 more for this season's wheat crop, if safely harvested, than last year's crop brought, according to an estimate made here.

In 1935 the northern and central areas harvested 44,000,000 bushels with an estimated value of \$22,000,000. With 45,000,000 bushels estimated in the same area this year and present prices ranging around 80 cents at country points the value will be \$23,000,000.

About two-thirds of the wheat cut-out of Alberta in 1936 will apparently be reaped in the northern half of the province, whereas last year the southern half had almost one-third more than the north.

Harvest which started 16 days earlier than last year, with an average date for the northern half of the province of Aug. 8, and was halted at the weekend by rain has been resumed in Edmonton district. Rains will greatly help green feed and ease the shortage of fodder for livestock held in some parts.

Charged With Murder

Investigations Continue Into Fire And Explosion In Montreal

Montreal.—Julius Cohen, 49, was charged with murder and Romeo Vidal, 35, charged with arson as investigation continued into the fire and explosion that razed a block of stores here, killing three firemen and injuring 50 other persons.

Cohen, co-proprietor of Maison Canadian, clothing store destroyed by the blaze, was arraigned in magistrate's court on the murder charge, while Vidal's jury found him criminally responsible for the death of Firemen Albert Guerin, Pierre Plouffe and Francois Beaulieu. He was remanded for preliminary hearing.

Fire Commissioner Massicotte, who signed the warrant for Cohen's arrest on arson charges, reopened inquiry into cause of the fire, and after hearing several witnesses ordered Vidal, manager of the clothing store, arrested on a charge of arson.

Australia Rearmament

Program To Be Launched In Commonwealth In September

Sydney, Australia.—A supplementary defence program will be launched in the commonwealth in September. It was announced officially.

This will amplify the three-year program begun in 1934 and the country will embark on a period of intensive rearmament while the two programs overlap.

In a speech at Manly, N.S.W., recently, R. A. Parkhill, minister for defence, announced the government would shortly consider "new defence program to complete the commonwealth's defence against air raids."

He forecast increase of the air force personnel to 2,060 with a citizen force of 395 members, and he hoped the manufacture of aircraft would soon be established in Australia.

Trade Mission To Far East

Montreal.—A trade mission to the far east, sponsored by the Canadian Chamber of Commerce with the support of the department of trade and commerce and co-operation of the Canadian Manufacturers' Association, will leave Vancouver for China January 19, 1937, it was learned here.

GOVERNOR-GENERAL IN THE WEST

On his first visit to Western Canada, Lord Tweedsmuir seems to be enjoying his official duties, judging by the smile he has here for Mr. A. J. Haggart (left), who received a warrant as Rover Scout Commissioner from His Excellency while the Vice-regal party was in Regina. In the centre looking on is Judge Rimmer, of the district court at Arcola, Bask.

Moves In Cycles

Scientists Think Radiation Output Of Sun Associated With Drought

Washington.—Amid government moves to aid mounting total of drought-ruined farmers, the Smithsonian Institution held a hope that another major dry period may not strike the north central grazing area of the United States until 1960.

For the last 100 years, weather records for the Great Lakes since 1837 the Smithsonian concluded that the drought area now "is near the bottom of what appears to be a 46-year precipitation cycle in some way associated with cycle variations in the radiation output of the sun."

Dr. Charles G. Abbot, institution secretary, announced that his cycle hypothesis, announced three years ago, "gives no support to pessimists who predict the great drought area will be converted into a permanent desert."

He said there was "every reason to believe the depths of the present drought will be succeeded, at the most a few years hence, by peaks of precipitation." If the cycle continues true to form, he said, the low point should be reached sometime between 1938-40, followed by "a rapid upswing."

May Abolish Penal Colony

Dreaded Colony In French Guiana May Disappear

Port Of Spain, Trinidad.—Rumor of France's storied and dreaded penal colony in French Guiana was to be abolished soon were heard after Trinidad authorities set four fugitives from Cayenne adrift in an open boat and ordered them to deport themselves.

Parched and exhausted after their hazardous journey, most of the seven remaining were too ill to be driven off this British island for several days. Two in serious condition were being treated in the hostel of the Salvation Army, long the friends of French fugitives.

As the police granted them brief respite here, members of the Trinidad Labor party, acting in co-operation with the English Labor party, pleaded with the French consul here on their behalf.

Given a new small boat and food for three weeks, the four were towed 12 miles out to sea by a police boat. When they reached they were rowing toward Venezuela.

They had been here nearly two weeks recovering from the effects of their trip from Cayenne.

JAPAN PROVES TO BE DRAG ON FACTORY WAGES

Yosemite, Calif.—Japan's spectacular rise as an exporter is linked, probably permanently, to a system of low selling prices and low wages, two British economists told the Institute of Pacific Relations.

They forecast increase of the air force personnel to 2,060 with a citizen force of 395 members, and he hoped the manufacture of aircraft would soon be established in Australia.

He also argued the unpromising prospects of a recovery in the silk trade and a reduction in the general demand for cotton goods "point to the likelihood of Japan swinging over to the export of other classes of manufactures to a greater extent than before."

The paper said since 1928 Japan's cotton production had increased 34 per cent. and its steel production 55 per cent., while in the United States steel production declined 54 per cent. in France 30 per cent., and in Great Britain 20 per cent.

"The general conclusion drawn," said the paper, "is that the industrialization of India and the Far East has come to stay and indeed all the portents are that it will continue to increase."

"The problem with which the western world is faced is that of peaceful adjustment of the new conditions which have arisen."

J. R. Stewart presented for the institute's secretariat a report asserting Japan's military occupation of Manchuria (now Manchukuo) was "economic futility."

APOLOGY FOR INSULTS IS ASKED BY GERMANY

Berlin.—Incensed over the "Kamrun incident," Nazi Germany ordered its warships in the Spanish zone to stand by for action while the commander of seven other warships driving toward Spain messaged Madrid he would "meet force with force."

In strong language Nazi officials demanded apologies from Madrid and assurances there would be no repetition of incidents such as the reported bombing of the German vessel Kamrun by Spanish loyalists.

Admiral Carla, in command of the warships steaming toward Spain, messaged he would "not tolerate" such incidents.

His cut radiograms backed up the government's warning to Madrid that German ships would use "all means at their disposal" to prevent acts deemed overt by the Nazis.

The Nazi foreign office said the Kamrun incident had tossed French neutrality proposals sky high.

Chancellor Hitler was said to be now demanding apologies and assurances from the Madrid loyalists before he would consider binding himself with an arms embargo.

A government spokesman said: "It's impossible to consider the French proposal until satisfaction is given in the Kamrun affair."

Port Of Spain, Trinidad.—Rumor of France's storied and dreaded penal colony in French Guiana was to be abolished soon were heard after Trinidad authorities set four fugitives from Cayenne adrift in an open boat.

Given a new small boat and food for three weeks, the four were towed 12 miles out to sea by a police boat.

When they reached they were rowing toward Venezuela.

The Wilhelmstrasse and the press had been aroused by the report from the official news agency that a Spanish loyalist cruiser Libertad, which was reported in Germany to have frustrated the Kamrun's effort to rescue endangered Germans, "lost all right to expect its flag to be respected further internationally."

As a matter of fact, the newspaper said, the ship was really under the control of mutineers who bestially murdered their officers and threw them into the sea.

The Spanish vessel's status, the newspaper continued, was "comparable to the legal status of a mad dog."

No Fall Session

Parliament Will Likely Meet Early In New Year

Ottawa.—At the present moment there is no intention on the part of the government to call a fall session of parliament, Prime Minister Mackenzie King declared. Parliament would be called early in the new year, the prime minister said.

If any situation arising in Geneva or in Canada made it necessary to call parliament, due notice would be given, Mr. Mackenzie King said, but "at the present moment there was nothing to indicate such a situation would arise."

Harvesting Big Crop

Rolla, B.C.—Farmers in this district will harvest wheat yielding up to 55 bushels to the acre, a survey of the district shows. Summer fallow crops are expected to maintain their position in the world's cotton goods trade only through "very low selling prices."

"There is not likely to be a substantial rise in the level of Japanese wages," they reported, "first, because with the growing population the supply of labor probably will outrun the demand, and secondly, because the close link between the agriculturists and factory workers acts as a drag upon factory wages."

They also argued the unpromising prospects of a recovery in the silk trade and a reduction in the general demand for cotton goods "point to the likelihood of Japan swinging over to the export of other classes of manufactures to a greater extent than before."

"The problem with which the western world is faced is that of peaceful adjustment of the new conditions which have arisen."

J. R. Stewart presented for the institute's secretariat a report asserting Japan's military occupation of Manchuria (now Manchukuo) was "economic futility."

Arab Terrorism

Jerusalem.—British military patrols were reinforced throughout the Holy Land following a new outburst of Arab terrorism that took a toll of 11 Jewish lives and brought the total number of Jews killed in the racial-economic war to 66.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors, entertainments, parties leaving for holidays or short trips, bridge parties, teas, etc. Please items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

Lee Lake has had more visitors this year than in any previous season.

There is no substitute for "guaranteed circulation"—and The Enterprise has it.

Mrs. Lytle, wife of Rev. A. A. Lytle, passed away in a Calgary hospital on Wednesday morning following a serious operation.

Angus J. Morrison, secretary of District 18 of the U.M.W.A. of A., was in town last week end, accompanied by John Stokaluk.

Mrs. (Dr.) George Kelman, senior, motored from Fernie to Calgary last week to visit her son, Dr. George Kelman, who is ill in hospital there.

Mr. and Mrs. "Babs" Johnson, of Hollywood, have been visiting Mr. and Mrs. Walter Purvis at Coleman, and Mr. and Mrs. W. Johnson here.

Apparently Judge T. M. Tweedie was not to be influenced by Hon. Hugill, Alberta's attorney-general, to give a rush judgment.

Dr. MacIntosh left Pincher Creek recently for New Glasgow, N.S. Doc plans on locating in the east, where he will resume his dental practice.

Local business people are beginning to admit that they are waking up to the fact that The Enterprise as an advertising medium CAN serve them best.

A young woman sitting in a local beauty parlor last week remarked that she had difficulty in maintaining her youth. The barber replied: "Why not quit him and get another."

Following a pleasant five-weeks' vacation in British Columbia and western U.S. points, Mrs. S. Trono and daughter Beatrice returned home on Sunday last.

A. E. Ferguson, of the Crows' Nest Undertaking Co., was a business visitor to or to Calgary during the week and incidentally attended a convention of funeral directors. He arrived back by Thursday morning's train.

Mr. P. Colombo has purchased the two vacant lots on the corner of State Street and Ninth Avenue, upon which he is having erected a neat four-roomed bungalow. Jack Packer is in charge of the construction work.

Dr. Bissonette, of St. Paul, Alberta, was a Pincher Creek visitor recently, accompanied by Mrs. Bissonette, where they were guests of the latter's sister, Mrs. Bower. They also visited their mother, Mrs. Dunlop, at Frank.

Hons. William Aberhart, premier of Alberta, and E. C. Manning, minister of trade and industry and provincial secretary, will officially open Red Deer's new milk condensery on Saturday, September 5th.

The Lake of the Woods Milling Company's grain elevator at Pincher Station was totally destroyed by fire at an early hour yesterday morning, together with about 25,000 bushels of wheat.

Mrs. Thomas Biggs, former resident of Fernie, passed away on August 16th in Seattle. Word to that effect was received last week by Mr. and Mrs. Kye Biggs, of Fernie. She is survived by her husband and a large grownup family.

Dr. H. B. Hoar returned the early part of the week from a visit to France and England. He was about the first of the local contingent to Vimy Ridge to return. Mrs. Alex Niven was the first to return to Lethbridge.

BEATRICE TRONO
A.T.C.M., L.I.S.M.
TEACHER OF PIANOFORTE AND
THEORETICAL SUBJECTS
Pupil of Gladys McElveen Egbert
CLASSES NOW OPEN

Wilfred Berry, of Bellevue, is erecting a summer cottage at Lee Lake.

The Queen Mary is believed to have clipped several hours off the Atlan crossing time.

Mr. and Mrs. L. S. Thompson have arrived to take up residence in Coleman, where he has accepted the position of C.P.R. night operator.

Mr. and Mrs. Vize, of Ottawa, are visitors here with Mr. and Mrs. George Brown and family. Mrs. Vize was formerly Miss Vera Brown.

Quite a number from this district attended the funeral of the late John Herron at Pincher Creek on Saturday.

Hardsurfacing of the highway between Fernie and Elko has been completed, and is reported an excellent job.

President Beatty's train passed west through Blairmore at 2:30 Saturday afternoon. A brief stop was made at Coleman.

Premier Aberhart stated on Sunday last that "God's house was the house of prayer." Then, why inject such nonsense as politics?

The annual convention of the Canadian Weekly Press Association will be held in Calgary on Friday and Saturday, October the 9th and 10th.

Fifteen years ago, C. F. Carswell took over the law practice of Mr. Matheson at Rimsky. Mr. Carswell is now associated with the law firm of Jackson & Carswell at Pincher Creek.

Mr. and Mrs. E. Linville, Miss Madeline Chardon and Mr. and Mrs. S. Purdy returned Monday from a few days camping and fishing on the Livingstone River.

A local party, going to camp at Race Horse Creek on Friday evening, last, found a camp fire left briskly burning. Then wonder how forest fires are started!

The marriage took place on Saturday morning last of Miss Myfanwy, second daughter of Mr. and Mrs. J. T. Griffiths, to Thomas, only son of Mr. and Mrs. Thomas Blower, both of Coleman. Rev. A. E. Larke officiated.

Mrs. J. L. McIntyre, who recently visited old friends in Fernie, also visited her sisters, Mrs. E. Sinnott, and her parents, Mr. and Mrs. W. Read, at Pincher City, before returning to her home in California.

Geo. Christophers, formerly of Blairmore, passed through here on Wednesday on his return to Edmonton, after spending a three weeks' vacation at the coast and western U.S. points.

Mrs. Perley Farnell passed away at Truro, N.S., on August 15th, aged 75.

Mrs. Ernest Hurley, of Lacombe, is a daughter, while Mrs. Albert McCurdy, Lethbridge, and Mrs. William Bates, Homeglen, Alberta, are sisters.

Tina and Billy, children of Mr. and Mrs. D. A. Howe, will leave this week end for Vancouver, where they enter a school for the blind. They will be accompanied to the coast by Mrs. Howe.

A quiet wedding took place in Natal on Wednesday of last week, when Anthony Megale, of Fernie, was united in marriage to Miss Louise Altomare, daughter of Mr. and Mrs. Luigi Altomare, of Natal. They will reside in Natal.
